THE FIRST IMPRESSION COUNTS

COLTENE primarily associates prosthetics with precision impression materials, which has been one of the company's core expertise since its foundation. With Coltex/Coltoflax, an extensive impression programme was developed back in the early 1970s, which is still valued by renowned prosthodontists to this day. The launch of PRESIDENT the first A-Silicone on the market in 1975 is viewed as a milestone in the development of high precision dental impression materials.

Today addition cross-linking impression materials are scientifically recognised as the gold standard and are indispensable in the dental practice. The development of practical cartridge systems which significantly simplified bubble-free mixing of impression materials also contributed to their success.

Thanks to the use of 'supertensides' with the introduction of the premium A-Silicone AFFINIS in 2001, impression-taking in the moist environment improved enormously. The outstanding surface affinity and optimised flow properties of AFFINIS ensure perfect impressions, even under the most difficult conditions.

For over two decades, many dentists swear by the SPEEDEX brand. Around 400 mil. impressions have been taken over

this period that underline the trust placed in COLTENE's competence and expertise. The worldwide success of SPEEDEX C-Silicones lies in the outstanding mix of economy and product properties similar to those of A-Silicone.

Impression materials from COLTENE belong to today's globally leading products. Special formulas allow precise impressions to be fabricated quickly and easily. Thanks to the wide product range, the user can utilise the right material for every indication.

Company

COLTENE is a global leader in the development, manufacture and sale of consumables and small-size equipment for dental treatment applications.

The Dental Group offers a wide range of products, encompassing six segments – solutions for almost all dental treatments. The complete endodontology programme includes root canal preparation with files and rinsing solutions, obturation and post systems. The next extensive range is centred entirely on restorative filling therapy. This particularly includes temporary and permanent filling materials, as well as adhesive systems and polymerisation lamps. Prosthetics represents a further main area. It includes a wide spectrum of condensation and addition cross-linking impression materials. The segments of treatment aids, infection control and rotating instruments round off the programme.

COLTENE has time and time again developed pioneering innovations for over 50 years, and Roeko for over a 100 years who offer the user first grade dental solutions.

Today the COLTENE Group operates production facilities in Switzerland, Germany, Brazil and the USA. It maintains a worldwide sales network with its own subsidiaries and distribution partners in over 120 countries. COLTENE therefore serves dentists, dental technicians, opinion leaders and universities with tailored quality products and services – worldwide.

ROEKO Comprecord

Comprecord is an air texturized retraction cord with a stable structure and a great total volume which makes Comprecord highly absorbent. The cord has a pliable structure that allows Comprecord to adapt easily to the sulcus without fraying and shedding fibers.

Advantages of Comprecord:

- pliable structure
- outstanding absorbency
- easy to place in the sulcus
- does not fray and shed fibers
- color coded for easy distinction of sizes

Non impregnated, 225 cm		
0	x-fine	515 000

Cartridges	2 × 50 ml

System 50 Accessories		
Universal Mixing Tip	40 pcs	60019663
Oral Tips Yellow	100 pcs	6555

Magic FoamCord had been developed in a free partnership with Prof. DDr. Dumfahrt and is the first expanding PVS material designed for easy and fast retraction of the sulcus without the potentially traumatic and time consuming packing of retraction cord.

How it works!

2 min*: Foaming action complete; 5 min*: Material completely cured.
Total Expansion 160%

**Magic
FoamCord®**

Gingiva retraction without cords!

Benefits

- Non-traumatic method of temporary gingival retraction
- Easy and fast application directly to the sulcus without pressure or packing
- Comfortable to the patient
- No haemostatic chemicals to contaminate the impression site – no need for extensive rinsing
- Outstanding retraction for perfect impressions

Impression
A-Silicone

Prosthetics

AFFINIS

The innovative surface affinity and optimised flow properties of AFFINIS ensure perfect impressions. The premium A-Silicone excels by virtue of fast wetting of the tooth and gingiva.

AFFINIS® DCode

With the upcoming digital era, the scannable A-Silicone AFFINIS DCode was developed to use with CAD/CAM technology without scan powder. AFFINIS DCode closes the gap between conventional and digital impression taking.

PRESIDENT® Classic PRESIDENT® The Original

The introduction of PRESIDENT in 1975 – the first A-Silicone in the market – is considered a milestone in the development of high-precision dental impression materials. With the use of polyvinylsiloxane (PVS) elastomers for the first time PRESIDENT users reached an unprecedented dimensional stability and precision, which today still characterizes an A-Silicone. The PRESIDENT brand is still convincing as a traditional product line of COLTENE with its sovereign quality. On the occasion of the 40th anniversary of PRESIDENT, the first A-Silicone line has been relaunched under the new brand name PRESIDENT The Original with additional consistencies and refreshed colors.

AFFINIS® BLACK EDITION

The black tray material AFFINIS heavy body BLACK EDITION reaches with gold or silver coloured AFFINIS PRECIOUS excellent readability of the impression. The unique colour combination displays details even more precisely and supports the qualitative assessment of the impression result.

Visible precision with love for details.

Brief description

Consistencies

AFFINIS®

Premium A-Silicone: top quality
Universal product range: putty, tray, 6 × wash
Dosage form in cartridges: 25 ml, 50 ml, 75 ml, 380 ml
Unique consistencies: AFFINIS PRECIOUS, BLACK EDITION
Optimal flow properties: top precision
Top dimensional stability: fitting accuracy
Automix: simple handling
Autoclavable: protection against infections
Smallest contact angle: best wettability
Scannable line: AFFINIS DCode

JET BLUE BITE

Exceptional handling with firm, accurate, fast set

JET BLUE BITE bite registration material flows with a smooth whipped-cream consistency exactly where you want it in a predictable quantity and ideal ribbon pattern. It offers a fast oral setting-time and sets rock hard for greater accuracy but is still flexible enough for easy trimming or cutting. The superior handling characteristics are the key for a perfect occlusal fit on the first try.

- Stays exactly where you want it
- No resistance to closure, no rebound!
- Rock hard for accuracy, yet flexible for easy trimming
- Pick your ideal speed:

Affinity on moist tooth structure

AFFINIS – a bench mark in impression technology

AFFINIS, an A-Silicone, differs in three characteristic features from other surface activated impression materials:

Innovative surface affinity

The differentiating element of AFFINIS is a fast and innovative affinity of mixed material to moist tooth structure and tissue (gingiva).

Optimized flow

AFFINIS however, based on its surpassing combination of additives which are capable of breaking material structures, displays a very low barrier to flow (self-contouring consistency) At the same time, the mixed material is optimal thixotropic not to drip off the preparation.

Better models

AFFINIS, due to its synergistic and extremely active surfactant system, displays a fast and outstanding wetting by water of the set impression. When pouring the gypsum, the dental technician will appreciate these properties.

First Ever Autoclavable Impressions

All AFFINIS and AFFINIS PRECIOUS impressions are now autoclavable at 134°C without the loss of its well-known and appreciated AFFINIS physical properties. The new autoclavable AFFINIS impression material with a heat-resistant impression tray and special adhesive provides an integrated system for completely new possibilities in prevention. AFFINIS impressions – not only clean, but also sterile.

A no void AFFINIS impression as seen by the dentist

AFFINIS PRECIOUS

Superior flow properties where it counts – In the mouth...

AFFINIS PRECIOUS polyvinylsiloxane (PVS) wash materials have a contact angle of only 10°. Its superior flow properties allow the impression material to easily capture all critical surface detail of the preparations in a wet environment.

...and in the lab

AFFINIS PRECIOUS was developed to produce accurate results in the mouth and in the lab. The wettability allows the wet gypsum to flow more easily into the impression, producing more accurate stone models. An accurate model is the key for the lab technician to create proper fitting restorations.

AFFINIS PRECIOUS flows directly into the sulcus preventing air entrapments.

Thixotropic properties prevent slumping and dripping.

AFFINIS PRECIOUS wash materials produce accurate, void free impressions.

AFFINIS MonoBody

AFFINIS MonoBody is tissue friendly and neutral in taste without side effects or patient discomfort. After a short oral setting time of 3.30 min the AFFINIS impression can be easily removed without residue or distortion. The impression is desinfectable without dimensional changes. The high elastic recovery of 99.75 % and dimensional change of just 0.2% are the essential characteristics for accurate restorations.

AFFINIS putty System 360

AFFINIS System 360 putty is truly kneadable, whose strong “firm body” is immediately noticeable once dispensed from the mixing unit with no signs of stickiness. The putty material can be manually-kneaded immediately in the hands without sticking to the gloves. This facilitates individual pre-forming of the tray material based on the clinical situation. The dentist is comforted with a reliable, automatically-mixed putty material for successful precision impressions.

AFFINIS DCode

AFFINIS impressions are known for quality at the highest level. With the scannable line AFFINIS DCode, impressions can be digitalized without scanning spray or powder. The work flow between dentist and dental laboratories becomes significantly more efficient and faster.

- Scannable without additional surface treatment
- Perfect snapset between mixing and oral setting time
- Thermoactive formulation
- Hydrophilic properties and excellent wetting behavior
- Outstanding thixotropy and high stability
- Autoclavable

A-SILICONE IMPRESSION MATERIAL

**A SMALL STEP FOR DENTISTS
A GREAT STEP FOR DENTISTRY**

PRESIDENT

The Original

The introduction of PRESIDENT as the first A-Silicone in the market is considered a milestone for dental impression materials. With the use of polyvinylsiloxane (PVS) elastomers for the first time PRESIDENT users reached an unprecedented dimensional stability and precision. To celebrate the 40th anniversary, the well-established brand has been modernized as **PRESIDENT The Original** with new consistencies and colors.

Universal Mixing Tip

One for all, all for one!

One new UNIVERSAL MIXING TIP – Always the right choice

- For all 50 ml and 25 ml microSystem™ cartridges from COLTENE
- For all COLTENE light and regular body, bite registration and gingival mask materials
- All common oral and spreader tips of 50 ml and 25 ml cartridges can be used
- Simple and precise application due to reduced extrusion forces
- Practical, flexible and economical

The following mixing tips can be replaced with the new UNIVERSAL MIXING TIP.

Impression

C-Silicone

Prosthetics

Speedex®

Speedex is a premium C-Silicone in A-quality. Speedex has elastic recoverability and reproduction, which is otherwise only achieved by A-Silicones. As a result of the low shrinkage, impressions remain dimensionally stable and can be cast for up to 7 days without problems.

All consistencies of Speedex are mixed with a Universal Activator. Processing is flexible by means of underdosing or overdosing. After just two minutes in the mouth the impression is fully set.

Rapid

Rapid, the C-Silicone with colour change for outstanding mixing control. The special wash material Rapid Liner changes colour with successful mixing. Dependable mixing and the practical dispensing system simplify precise impression-taking.

Coltex® | Coltoflax®

With Coltex|Coltoflax began the success story of COLTENE silicones. A putty and three different consistencies, Coltex|Coltoflax offer an extensive product range. The right material for every indication and high quality are the factors that assure the right impression.

Brief description	Consistencies	
SPEEDEX®	WASH	TRAY
<p>C-Silicone in A-Quality: top quality of the C-Silicones High dimensional stability: up to 7 days Variable processing time: depending on dosage of the activator</p>	<p>light body medium body</p>	<p>putty</p>
RAPID	WASH	TRAY
<p>Basic product range: 2 × putty, 1 × wash Mixing control: colour change during mixing</p>	<p>Rapid Liner</p>	<p>Rapid Rapid soft</p>
COLTEX® COLTOFLAX®	WASH	TRAY
<p>First silicone from COLTENE: for every indication Extensive range: 1 × putty, 3 × different consistencies</p>	<p>Coltex extrafine Coltex fine Coltex medium</p>	<p>Coltoflax</p>

FAST IN A MOIST ENVIRONMENT

Speedex®

THE G-SILICONE WITH A-SILICONE QUALITIES.

Speedex offers physical properties that approximate to those of addition cured silicones – polyvinylsiloxanes. The Speedex system gives the advantage to work with only one activator for 3 consistencies.

Speedex offers:

- 7 DAYS DIMENSION STABILITY
- CONTROLLABLE WORKING TIMES
- SURFACE ACTIVE
- MOISTURE CONTROL
- OPTIMIZED PRECISION
- SUPERIOR DETAIL
- EXCELLENT FLOW BEHAVIOURS

ADDITIONAL BENEFITS:

Haemostatic or anaesthetic substances can not influence the setting process. The handling with latex-gloves is also uncritical.

Speedex

Speedex medium has outstanding wettability and excellent flow characteristics. Saliva and blood are displaced by Speedex medium and have no negative side effects. With the variable setting time of Speedex medium the important mucosal movements, which are necessary for the full and partial denture technique, can be taken very precisely. A perfect impression is the key for an accurate fitting denture.

High dimensional stability:
models can be poured up to seven days after impression taking.

Wax

Modelmaking

Laboratory / Practice

HYGENIC u-shaped occlusal rim wax

Recessed base aids adaption to base plate. Can be reshaped at room temperature to fit individual arch.

HYGENIC u-shaped occlusal rim wax		
Standard Package	21 pcs	H04030
Laboratory Package	100 pcs	H00822

HYGENIC bite-wafers

This bite-mask contains a thin aluminium foil within two wax layers. Laminated, blue.

HYGENIC bite-wafers		
Double	24 pcs	H00825

U-shaped and designed for a fast precise retain of the situation.

HYGENIC bite-wafers		
Yellow, soft	50 pcs	H00839
Green, hard	50 pcs	H03365

HYGENIC medium-soft no. 3 pink wax

Easily softened and cooled to minimize shrinkage. Soft modeling.

HYGENIC medium-soft no. 3 pink wax	
450 g	H00806
2.25 kg	H00812

HYGENIC red wax

This wax shows the same consistency as the medium-soft no. 3 pink wax.

HYGENIC red wax	
450 g	H00805
2.25 kg	H00811

HYGENIC extra tough wax

Durable, all-purpose wax that is a carefully prepared blend of exclusive waxes. Tough, pliable and sufficiently tacky to hold teeth well. Takes polish and boils out.

HYGENIC extra tough wax	
450 g	H00803
2.25 kg	H00809

HYGENIC yellow bite wax

Economical alternative to Beeswax with many of the same characteristics.

HYGENIC yellow bite wax	
450 g	H00807
2.25 kg	H00813

HYGENIC square wax ropes

Sticky, soft and narrow wax ropes.

HYGENIC square wax ropes		
4.8 mm ² × 279 mm Red	44 pcs	H00819
4.8 mm ² × 279 mm White	44 pcs	H00820

HYGENIC round wax strips

Shaped in round strips, used for preserving the periphery roll and extending and building up impression trays and post-damming.

HYGENIC round wax strips		
4.8 mm ² × 279 mm Red	80 pcs	H00817
4.8 mm ² × 279 mm White	80 pcs	H00818

HYGENIC wax sticks

Readily formed without heating, sticks are softer and tackier than „Round Wax Strips“ to minimize tissue displacement.

HYGENIC wax sticks		
Scented	48 pcs	H00826

HYGENIC boxing wax

Designed for boxing impressions, withstands extreme heat given off by dental stone during setting.

HYGENIC Boxing wax, regular		HYGENIC boxing waxes, extra fine	
1.6 mm × 38.4 mm × 305 mm 450 g	H00815	1 mm × 38.4 mm × 305 mm 450 g	H00816
1.6 mm × 38.4 mm × 305 mm 2.25 kg	H00837	1 mm × 38.4 mm × 305 mm 2.25 kg	H00838

HYGENIC beeswax

Made of pure, natural beeswax with no additives. Wax softens easily under hot water.

HYGENIC beeswax		
450 g	48 pcs	H00833

HYGENIC orthodontic tray wax

Sticky, soft and narrow wax ropes.

HYGENIC Orthodontic Tray Wax Sticks		
White	48 pcs	H00827
