Zhermack

# Zhermack

Progress, constantly. Creating value, to make the quality of the products accessible to the world. With creativity, and especially with the ability to transform every challenge into a development opportunity. To dynamically seize the market trends and understand the needs of partners, clients and customers. To make our solutions accessible worldwide. All this is the basis of Zhermack's growth, and since its foundation, over 35 years ago, the company has never ceased to develop and grow.

The clarity of the dream continues to drive Zhermack along this road, to "make you feel confident in everyday life". This is Zhermack's goal and philosophy of life. And it is a dream that is realised every day. Because everything aims at transmitting confidence. The way is charted with the awareness that Zhermack must contribute to improve oral health throughout the world, now and for future generations.

The contribution of Zhermack to people's oral health stems from the value that is given to the quality of its products. A quality that is born from scientific research and from the commitment to continuous education, to reach and always set new goals that contribute to improve the lives of people all over the world.

*«Zhermack is a company that is committed with constancy to creating value, to make the quality of its products accessible worldwide. Zhermack's success resides in its ability to be creative, to transform every challenge into a growth opportunity, and to be dynamic, in order to seize the market trends and understand the needs of partners, clients and end customers».*

**Paolo Ambrosini**  
General Manager

## Our solutions.

Specific products and solutions for the dental laboratory, conceived exploiting the skills acquired with materials for the dental practice. Starting from development and production of duplication silicones and masks, Zhermack has extended its offer with quality products such as dental stones, resins and investments to satisfy the needs of the numerous laboratory processes involved in the fabrication of fixed and removable prostheses. Not just consumables, but also a range of equipment designed for laboratory use: ovens, innovative welders, sandblasters, steam generators and other appliances to satisfy the principal needs of the laboratory technician. A system to accompany lab technicians in their daily work.

## We produce measurable results.

Zhermack directly manages all the working stages - from formulation to packaging, from the production of raw materials to the mixing - to produce all its solutions. Validated and controlled processes are the guarantee with which Zhermack is able to offer products that are constant in their characteristics, as well as certified in quality.

This, together with the technological and process integration adopted over time, is what makes Zhermack one of the major producers in the field of dental products.

## Quality, certified. Year after year.

In 1993 Zhermack received the ISO 9001 certification for its Quality Management System. In 2007 it obtained the ISO 22716 for Cosmetics - Good Manufacturing Practices (GMP).

In 2012 the ISO 13485 certification for the Quality Management System of Medical Devices, necessary for the exportation of Zhermack products on the global market.

A system to guarantee Zhermack and its users.

NOTE: The images and texts related to the technical data of the individual products and accessories may be changed during the period of validity of the catalogue. The images are only representative of the showed products. Not all products are sold in every country. For further information on product availability, please contact your local representative.

## Hygiene

Impressions arriving from the dental practice are often contaminated with saliva and blood.

Correct disinfection is vital to protect the health of laboratory technicians. Zhermack **disinfectants** with a **complete spectrum of action** are **enhanced with surfactants to improve the flow of the stone during pouring.**

- Zeta 7 Spray (with surfactants)
- Zeta 7 Solution (without surfactants)

## Model preparation

An accurate model is the basis of every well-made prosthesis. Zhermack offers a **complete system** of impression materials, materials for models and equipment, all developed to be used as a system to ensure maximum precision. It also offers a series of scannable products to facilitate the lab technician with **CAD/CAM technology.**

- Platinum
- Zetalabor and Titanium
- Elite Double
- Gingifast
- Elite Dental Stones
- Elite LC Tray
- Elite Mix
- Doublemix
- A 12
- SQM 25 N

## Casting and welding

The prosthodontic market requires ever more speed and precision. Thanks to more than 35 years' experience, Zhermack has developed a combined offer to **optimise time in the laboratory**, without compromising on quality.

- Elite Vest
- DM
- DE
- Quasar
- Quasar Plus
- Ario 35
- Cyclope

## Surface polishing and cleaning

**Surface cleaning and polishing** are simple operations, but fundamental for the quality of the finished prosthesis. Zhermack's experience has enabled to develop a **wide range of products**, adaptable to the main laboratory needs.

- California and Sand S 24 R
- VAP 8A and VAP 8
- VAP 6A and VAP 6
- Water softener AD 8
- Zeta Sonic
- Zeta Sand

# CAD/CAM solutions

The CAD/CAM solutions developed by Zhermack combine traditional techniques (impression taking, model preparation, prosthesis) with the most innovative digital techniques.

Saving time in data acquisition, simplifying and improving the quality of CAD/CAM processes.

The Zhermack offer includes a wide range of scannable silicones and stones readable without using reflective sprays.

# Platinum 75 CAD

A-Silicone

CAD/CAM solutions / Bite registration

**Platinum 75 CAD** is an addition silicone recommended for all CAD/CAM users for making scannable bite registration keys in the articulator.

## Characteristics

- Accurate reproduction of details
- 75 Shore A hardness
- Mixing ratio 1:1

Platinum 75 CAD

## Advantages

- Quicker working time to improve efficiency in the laboratory
- Easy to finish, including with bur
- Scannable without using reflective sprays

Platinum 75 CAD scan

Mixing time (min:s)	Working time* (min:s)	Setting time* (min:s)	Detail reproduction (µm)	Elastic recovery	Strain in compression	Linear dimensional change (after 24 h)	Hardness (Shore A after 24 h)	Heat resistance
0:30	1:00	7:00	20	> 99.5 %	< 1 %	0.05 %	75	200 °C

\*The times mentioned above are intended from the start of the mixing phase at 23 °C (73 °F).

Code	Packaging
C400741	800 g (475 ml) Base + 800 g (475 ml) Catalyst

# Occlufast CAD

A-Silicone

CAD/CAM solutions / Bite registration

Developed for use in the dental practice, but also excellent for laboratory use, **Occlufast CAD** is an addition silicone for bite registration, scannable without using reflective sprays.

The short working time allows the laboratory work to be optimised.

## Characteristics

- Accurate reproduction of details
- High hardness: 95 Shore A
- Mixing ratio 1:1
- Setting time 60 seconds\*

## Advantages

- Short setting time
- Scannable without using reflective sprays
- Easy to finish, including with a bur

Occlufast CAD

Occlufast CAD scan

\*\*The times mentioned must be intended at 35 °C - 95 °F.

## Occlufast CAD - A-Silicone for bite registration

Code	Packaging
C200800	2 x 50 ml cartridges (Base + Catalyst) + 12 green mixing tips

\*Time in mouth: could be longer depending on environmental conditions.

**Elite Master** and **Elite Rock** are type 4 stones to make scannable master models without using reflective sprays.

**Elite Master** is reinforced with resin particles, making the material easy to work and resistant to chipping.

**Elite Rock** is an extra hard stone with high compressive strength, recommended for making master models for fixed prostheses.

Elite Master is scannable in all colours, Elite Rock only in Silver Grey.

## Characteristics

Elite Master:

- Scannable without using reflective sprays
- Formaldehyde free
- Resistant to chipping

Elite Rock:

- Also available in fast version to optimise working time
- Low expansion, even after 48 hours
- Accurate reproduction of details

## Advantages

- Time savings in data acquisition with optical scanners
- Greater precision compared to use of reflective sprays
- Cleaner environment

More details on page 48

**Gingifast CAD** is a scannable fluid addition silicone, suitable for reproducing gingival morphology on models.

The elastic version with high tear resistance is recommended in the presence of undercuts or very thin thicknesses.

The rigid version is ideal for implant prosthesis applications.

## Characteristic

- Two hardness versions: Elastic 40 Shore A, Rigid 70 Shore A
- Rapid working times
- Mixing ratio 1:1

## Advantages

- Time savings in data acquisition with CAD/CAM
- Greater precision compared to use of reflective sprays
- Compatible with both direct and indirect techniques
- Reduction of waste, thanks to the smaller tips

Gingifast CAD Elastic and Rigid

A hand holding a test tube with a yellow background overlay. The test tube is tilted and contains a dark liquid. The background is a solid yellow color, and the hand is visible in the lower left corner. The overall image has a soft, blurred quality.

# Model preparation

An accurate model is the basis of every well-made prosthesis. Possible errors during this phase have repercussions on subsequent phases and are extremely difficult to eliminate.

Sensitive to the needs of lab technicians, Zhermack has designed a system of laboratory and impression materials able to work in synergy to obtain accurate models.

## Model preparation

# Stone models

The choice of material to develop the model contributes to the success of the prosthesis. The types 3 and 4 stones in the Elite range are formulated, developed and produced in-house by Zhermack which controls the various phases of the production process to offer high quality constant standards.

Available in a wide range of colours and different packs, Zhermack stones can meet the main diverse needs of the laboratory.

They are compatible with the most commonly used impression materials present on the market (including polyethers and hydrocolloids) and are formulated to deliver the best performance when used in combination with Zhermack materials.

# Dental stones

## Dental stones classification

The international regulation EN ISO 6873/97 classifies dental stones in different types, based on their linear setting expansion and compressive strength.

Higher type does not always mean higher quality for a stone. Type 5 stones, for example, are characterized by a high compressive strength but have also a high expansion, thus they are suitable for specific applications only.

Type 3 and 4 stones are instead the best for the dental use, because characterized by high compressive strength and low expansion that allow a higher dimensional stability over time and therefore precision in the reproduction of detail.

Type	Linear setting expansion %				Compressive strength MPa	
	2 h		24 h		1 h	
	min.	max.	min.	max.	min.	max.
1	0.00	0.15	-	-	4.0	8.0
2 (Class 1)*	0.00	0.05	-	-	9.0	-
2 (Class 2)**	0.06	0.30	-	-	9.0	-
3	0.00	0.20	-	-	20.0	-
4	0.00	0.15	0.00	0.18	35.0	-
5	0.16	0.30	-	-	35.0	-

## Zhermack dental stones

## A stone for every application

### For fixed prostheses

#### Stone for bases | Elite Base

- Optimised to be used in combination with master model → same expansion (type 4)
- Easy to cast → fluid

#### Stone for master model | Elite Rock or Elite Master

- Accurate reproduction of details → low expansion
- Chamfering without splintering → resin particles
- Hard stone → compressive strength

#### Stone for antagonist | Elite Model

- Cheaper than master model → type 3
- Hard stone → compressive strength

#### Stone for articulator | Elite Arti

- Maintain correct occlusion → low expansion
- Simplifying positioning in the articulator → thixotropic
- Perfect fixing with antagonist → adhesion

### For removable prostheses

#### Stone for articulator | Elite Arti

- Maintain correct occlusion → low expansion
- Simplify positioning in the articulator → thixotropic
- Perfect fixing with antagonist → adhesion

#### Stone for master model | Elite Stone

- To be used at high temperature → resistant to thermal shocks
- To be used with frameworks → wear resistance

# Elite Master | Elite Rock | Elite Base | Elite Stone

Type 4 stones for master models and bases

## Model preparation / Stone models

Type 4 stones have high compressive strength and low expansion, ideal for making master models.

Each stone developed by Zhermack has specific technical characteristics for each individual application.

**Elite Master** is the stone for master models in fixed prosthesis applications with resin particles, for chamfering without splintering.

**Elite Rock** is an extra hard stone for master models in fixed prosthesis applications.

**Elite Base** has excellent fluidity for preparation of bases, including without vibrator.

**Elite Stone** is a stone specifically conceived for master models in removable prostheses, resistant to thermal shock and abrasion from frameworks.

Thanks to its special formula optimised for reading with CAD/CAM systems, models made with Elite Master (in all colours) and Elite Rock (Silver Grey) are scannable without using reflective sprays.

### Characteristics

- Low expansion, even after 48 hours
- Accurate reproduction of detail
- "Fast" version to save time (Elite Rock)

Elite Master:

- Formaldehyde free
- Resistant to chipping

### Advantages

- Elite Master: chamfering without splintering, thanks to the high resistance given by the resin particles incorporated in the stone
- Thixotropic to simplify fabrication of the model
- Elite Base: high fluidity, even without vibration

# Elite Model | Elite Model Fast

Type 3 stones for antagonists

Model preparation / Stone models

**Elite Model** is a high quality type 3 stone indicated for making antagonists and filling flasks in removable prosthesis applications with heat-curing resins.

## Characteristics

- Low expansion
- High mechanical characteristics
- Universal use

## Advantages

- Model fabrication facilitated by the high thixotropy
- Extreme versatility due to its superior characteristics compared to other stones of the same type

# Elite Transparent

A-Silicone

Model preparation / Masks

**Elite Transparent** is a transparent fluid two-component addition silicone.

Formulated for making transparent silicone masks in the laboratory for composites and light-curing resins.

## Characteristics

- Highly transparent
- Low viscosity
- High final hardness 72 Shore A

## Advantages

- Shorter working times
- Composites or resins act on more compact surfaces without dispersion layer, thanks to the light curing in an oxygen free atmosphere
- Easy and quick to apply
- Possibility to retain the mask for future use

Elite Transparent

C401600	1 x 50 ml cartridge + 6 yellow mixing tips

# Guide to use

A-Silicones vs C-Silicones

Model preparation / Masks

## Addition silicones

- Excellent dimensional stability
- Resistant to heat up to 200°C
- Excellent surface definition

**Platinum 75 CAD**  
**Platinum 85 TOUCH**  
**Platinum 85**  
**Platinum 95**

Indicated for lengthy processes (e.g. work on implants with diagnostic wax-up), processes requiring high definition and detail reproduction (e.g. veneers), use with thermoplastic materials with a high curing temperature, heat-cured resins and self-curing resins.

## Condensation silicones

- Lower dimensional stability
- Resistant to heat up to 100°C
- Lower surface quality

**Zetalabor (85 Shore A)**  
**Titanium (95 Shore A)**

Indicated for short processes and use with heat-curing and self-curing resins.

## Examples of application

**Removable prosthesis**  
with self-curing resin

**Removable prosthesis**  
prosthesis repair

**Removable prosthesis**  
complete denture with  
hot curing resin

**Removable prosthesis**  
complete denture with  
self-curing resin

**Fixed prosthesis**  
silicone masks for composite  
temporary crown

**Fixed prosthesis**  
artificial gum with  
indirect technique

# Platinum

A-Silicones

Model preparation / Masks

**Platinum** is a high precision addition silicone available in 95, 85, 85 TOUCH or 75 CAD versions. All silicones in the line are characterised by excellent dimensional stability, short working times and ease of use.

Zhermack offers a complete system of putty silicones with different hardnesses, delivering high performance in numerous applications, including dental aesthetics. To satisfy the various needs of daily practice, Platinum 75 CAD silicone is designed for scanning with CAD/CAM systems and is ideal in combination with Platinum 95 for excellent reproduction of details. Recommended to make masks and counter-moulds.

## Characteristics

- Availability in a wide range of hardnesses
- Accurate reproduction of details
- Resistant to heat up to 200°C
- Mixing ratio 1:1

## Advantages

- Can be used for long processes (for example, implants with diagnostic wax-up) without altering the dimensional references
- Can be used with thermoplastic materials, thanks to heat resistance of up to 200°C
- Easy to work, including with a bur

Designed for the dental laboratory, **Zetalabor** and **Titanium** condensation silicones are characterised by high hardness and good mechanical properties.

They can be used in various applications requiring short times and not excessively high working temperatures. Zetalabor and Titanium are recommended for counter-moulds in removable prosthesis applications, masks for creating artificial gums using the indirect technique, moulds for preparation self-curing resins and numerous other applications. For more than 35 years, their ease of use has helped speed up laboratory procedures and improve the everyday performance of lab technicians.

**Indurent Gel** is the gel catalyst completing the range. Its characteristic red colour makes it easy to recognise when the mixture is homogeneous. Easy to measure, it can be used with all Zhermack condensation silicones.

## Characteristics

- Resistant to heat up to 100°C
- Good precision
- Silicones to mix with the gel catalyst only

## Advantages

- Time saving
- Excellent quality/price ratio
- For use with hot and cold resin techniques

## Model preparation

# Duplication

Interpreting the needs of lab technicians, Zhermack R&D laboratories have developed Elite Double, a wide range of duplication silicones characterised by accurate reproduction of details and excellent dimensional stability.

The high elasticity and high resistance to tearing make removal of the model from the silicone easy and safe.

For excellent results even in the most complex situations.

# Elite Double

A-Silicones

Model preparation / Duplication

The **Elite Double** line includes a wide range of duplication silicones. Designed to meet the lab technician's different needs in both fixed and removable prosthesis applications. The range consists of 9 products.

Elite Double has different colours, four different final hardnesses and three setting times: normal, fast and extra fast, the latter formulated specifically for automatic mixers. Elite Double retains high and constant fluidity throughout the working time, delivering a homogeneous bubble-free result.

## Characteristics

- Resistance to stretching and tearing, including with thin thicknesses
- Accurate reproduction of detail
- High fluidity
- High dimensional stability over time
- High elastic recovery

## Advantages

- Optimisation of working times, particularly when compared with duplication with hydrocolloids (setting time 5:00, 10:00, 20:00)
- The model can be duplicated a number of times, thanks to the dimensional stability over time and high elastic recovery
- Compatible with stones, polyurethane resins, acrylic resins and phosphate and alcohol-based investments
- High fluidity: does not require mixing in a vacuum

# Gingival reproduction

To reproduce artificial gingiva on a model, Zhermack offers top quality, precise polyvinylsiloxane products with long stability to facilitate work in the laboratory.

They retain their characteristics unaltered throughout all phases of the process, giving the lab technician more peace of mind.

#### A-SILICONES

<b>Gingifast Elastic</b> .....	54
<b>Gingifast Rigid</b> .....	54
<b>Gingifast CAD Elastic</b> .....	54
<b>Gingifast CAD Rigid</b> .....	54

**Gingifast** addition silicones are conceived to reproduce gingival morphology on models in fixed prosthesis and implant applications. Zhermack proposes the most suitable gum mask for all types of application.

**Gingifast Elastic** guarantees excellent aesthetic results, thanks to its translucence and the presence of fibrils to give a natural effect. Particularly suitable in the presence of undercuts and thin thicknesses.

**Gingifast Rigid** is indicated for the direct technique. Thanks to its balanced hardness, it can be worked easily with burs and is the top product in the field of implant prosthetics.

**Gingifast CAD**, a scannable fluid silicone available in two versions, Rigid and Elastic, completes the range. Scannable and readable without requiring reflective sprays, it is conceived for maximum performance in acquiring 3D data, saving time, simplifying processes and improving quality.

## Characteristics

- Various hardnesses: Elastic 40 Shore A, Rigid 70 Shore A
- Setting time: 10:00
- Mixing ratio 1:1

## Advantages

- Compatible with the various techniques used to make artificial gums (direct and indirect)
- Excellent aesthetic results
- With the Gingifast CAD formula, very small mixing tips can be used reducing silicone waste

# Elite LC Tray

Light-curing resins

Model preparation / Custom impression trays

**Elite LC Tray** is a line of light-curing resin plates for custom impression trays. Also indicated for making bases for mounting teeth and bite plates in removable prosthesis applications.

**Elite LC Tray** can be used to make bases and custom trays of various sizes to meet the main requirements in this application.

**Elite LC Tray ROUND** is particularly indicated for laboratories wanting medium-sized ergonomic plates.

## Characteristics

- Cured with either halogen or UV light (3 - 5 minutes)
- Stable to daylight or artificial light for about 20:00
- Available in three colours: blue, white and pink
- Minimum shrinkage after curing

## Advantages

- Easy to model, not sticky
- Quick, saves time with respect to traditional self-curing resins
- Uniform thickness

Elite LC Tray

Elite LC Tray ROUND

# Casting

Constant research for ever better products for the user and lengthy experience in prosthodontics have enabled Zhermack to develop a system of top quality products able to work in synergy to guarantee excellent results in all phases of the process to create metal prostheses.

Zhermack investments and sands simplify the lab technician's work, enabling top quality prostheses to be made easily, quickly and cheaply.

## Casting

# Investments

The Elite Vest line of investments is conceived to simplify the use of the investment in the laboratory and reduce stocks.

All the most common fixed and removable prosthesis applications can be covered with just two powders (one for fixed prostheses and one for frameworks) and a universal liquid.

### PHOSPHATE INVESTMENTS

<b>Elite Vest Plus</b> .....	66
<b>Elite Vest Cast</b> .....	66
<b>Elite Vest Liquid</b> .....	66

Just two types of powder and one universal liquid allow casts to be made with all alloys\* and pressable ceramics.

**Elite Vest Plus** is the universal precision investment for fixed prostheses, compatible with non precious alloys\*, precious alloys and pressable ceramics.

**Elite Vest Cast** is a precision investment specific for frameworks, compatible with base alloys\* and precious alloys.

**Elite Vest Liquid** is the universal mixing liquid for both investments.

## Characteristics

- Quick or traditional preheating
- Fine powder, carbon-free formulas with expansion adaptable to the working technique
- Excellent precision, particularly in implants and large bridges

## Advantages

- Easy to use and manage: just two products for all types of work
- Flexibility: expansion can be adapted to the different needs
- Work speed: smooth alloy surface after preparation

# Hygiene

Cleaning and disinfecting impressions coming from the dental surgery are a safeguard against infections. Choosing effective products with a complete spectrum of action is therefore essential to protect the health of laboratory technicians.

Quick acting easy-to-use products, free from toxic substances such as phenols and aldehydes. Like the products in the Zeta Hygiene range, developed from Zhermack's experience in the cold disinfection and sterilisation of medical-surgical devices. Comprehensive solutions, regulated by strict production standards and controlled and tested according to the most recent European regulations for an adequate protection every time.

Hygiene / Hygiene lab applications

Zhermack offers excellent performance products for impression disinfection. A complete spectrum (bactericidal, fungicidal, tuberculocidal and virucidal) and excellent compatibility with different types of impression material. In full compliance with the latest European Norms on disinfection.

**Zeta 7 Spray** is a ready to use, disinfectant spray for a quick and easy disinfection of impressions.

**Zeta 7 Solution** is a full spectrum concentrated disinfectant.

Zeta 7 Spray

## Characteristics

- Complete spectrum of action developed and tested according to the latest European Norms on disinfection
- Compatibility with all impression materials (silicone, alginate, polyether and polysulphides)

## Advantages

- **Efficacy:** complete protection for professionals in dental practices and laboratories
- **Excellent performance:** respects the dimensional stability of impressions characteristics and their compatibility with dental stones and improves accuracy in the reproduction of stone models

Zeta 7 Solution

Product	Type of product	Active ingredients	Dilution	Action time (min:s)	Distinctive characteristics	Spectrum of action
Zeta 7 Spray	Disinfectant	Alcohols	Ready to use	3:00	Improve smoothness of gypsum on impressions surfaces and reduce the formation of bubbles	<b>Bactericidal:</b> EN 13727 (S. aureus, P. aeruginosa, E. hirae) <b>Fungicidal:</b> EN 13624 (C. albicans) <b>Tuberculocidal:</b> EN 14348, EN 14563 (M. terrae) <b>Virucidal:</b> EN 14476 (tested on Poliovirus, Adenovirus, Norovirus, Parvovirus including HIV, HBV, HCV)
Zeta 7 Solution	Disinfectant	Quaternary Ammonium Salts, Phenoxyethanol	1 %	10:00	Very concentrated, allows for the preparation of up to 100 litres of disinfectant solution	<b>Bactericidal:</b> EN 13727 (S. aureus, P. aeruginosa, E. hirae) <b>Fungicidal:</b> EN 13624 (C. albicans) <b>Tuberculocidal:</b> EN 14348, EN 14563 (M. terrae) <b>Virucidal:</b> EN 14476 (tested on Poliovirus, Adenovirus, Parvovirus, Norovirus including HIV, HBV, HCV)

Code	Product	Packaging
C810050	Zeta 7 Spray	750 ml bottle with foam cap
C810048	Zeta 7 Solution	1 litre bottle

**Algitray** and **Gypstray** are ideal for the cleaning and removal of alginates and gypsum residues from trays and instruments. They offer deep cleaning action even in less accessible areas, protecting materials and allowing a safe use in all cases.

**Algitray** is a specific neutral pH cleaner for the removal of alginate residues from all types of impression trays and other instruments.

**Gypstray** is a ready to use solution for the removal of gypsum residues from impression trays, spatulas or other instruments.

Algitray and Gypstray

## Advantages

- **Efficacy:** helps eliminate all traces of alginate and gypsum even in less accessible areas
- **Protection of materials:** non-aggressive formula

Product	Type of product	Active ingredients	Dilution
Algitray	Alginate remover	Alginate dissolvers	Solution powder: 10 % Liquid: ready to use
Gypstray	Gypsum remover	Gypsum dissolvers	Ready to use

Code	Product	Packaging
C400430	Algitray powder	2 x 500 g tub (powder) + measuring cup
C400433	Algitray liquid	3 litres container
C400441	Gypstray	3 litres container

# Equipment

An integrated system for the dental laboratory, developed by Zhermack to simplify and improve everyday work.

Consumables (addition and condensation silicones, silicones for duplication, stones, investments...) and specific high quality, technologically advanced equipment for all the main phases in the production process with maximum functionality and competitive performance.

Equipment

# Model preparation

Precision, quality, satisfaction. The ideal process leading from the model to the prosthesis. Together with Zhermack consumables, Zhermack equipment is suitable to achieve a precise and top quality model, to give the patient a high quality prosthesis.

Less time, more satisfaction. For the patient and for the dentist.

**VACUUM MIXER FOR STONES AND INVESTMENTS**

**Elite Mix** ..... 84

**AUTOMATIC MIXER FOR DUPLICATION A-SILICONES**

**Doublemix** ..... 86

**VIBRATOR FOR STONES AND INVESTMENTS**

**A 12** ..... 88

**SQM 25 N** ..... 89

# Elite Mix

Vacuum mixer for stones and investments

Equipment / Model preparation

**Elite Mix** is a vacuum stone and investment mixer for model preparation. Versatile and compact, it has a functional design.

The completely electronic control provides constant mixing quality and silent operation. The software installed allows to set different parameters so that you can customize the entire mixing cycle.

## Characteristics

- Ten different programs which can be set with the following parameters:
  - Spatula mixing time
  - Spatula mixing speed between 100 and 450 rpm
  - Pre-spatula mixing
  - Pre-insertion vacuum
  - Spatula rotation direction reversal interval
  - Vacuum level
- Electronic vacuum control and double filter
- Vacuum generated by membrane pump inside mixer
- Wall mounted or table top, with optional support

## Advantages

- The "oil free" vacuum pump requires no maintenance
- The Elite Mix mixing bowls have rounded internal surfaces for easy removal of the mix and cleaning
- Ten customisable programmes, including six default programmes for Zhermack stones

Elite Mix with bench stand

# Doublemix

Automatic mixer for duplication A-Silicones

Equipment / Model preparation

**Doublemix** mixer is designed to automatically dose and mix fluid addition silicones for model duplication in the laboratory.

Can be used to make single or series duplications rapidly and with great precision. Easy to use, delivers uniform bubble-free mixing with constant, quicker and more satisfying results. Fitted with a dosing pump with a mixing ratio of 1:1 and rotatable mixing tip to facilitate silicone delivery. The ease of use and compatibility with Elite Double Extra Fast (1 kg and 5 kg) and the principal duplication silicones on the market make Doublemix a versatile efficient appliance.

## Characteristics

- Rapid coupling of containers with flow shut-off valve
- Adjustable plate for holding mixing tip
- Optional clear 2 kg containers for use with main types of silicone

## Advantages

- Model duplication in just five minutes (using Elite Double Extra Fast)
- Consistently correct mixing ratio, thanks to the 1:1 ratio dosing pump
- Optimum control of silicone waste
- The quick connection system and flow shut-off valves prevent the formation of air bubbles during silicone delivery

# A 12

Vibrator for stones and investments

Equipment / Model preparation

**A 12** is a vibrator for pouring stone into impressions and investment into preparation rings.

## Characteristics

- Electronic vibration regulation
- Working surface 230 x 140 mm

## Advantages

- Rubber surface, easy to remove and clean
- Support feet improve vibration on the vibrating surface

A 12

A 12

# SQM 25 N

Model trimmer

Equipment / Model preparation

**SQM 25 N** is designed for wet trimming of stone models.

It is fitted with a constantly functioning water cooling and washing system controlled automatically by a solenoid valve. The abrasive disc makes trimming precise, enabling the operator to meet the specific technical requirements of the task.

## Characteristics

- Water flow controller on front
- Aluminium case
- Abrasive bakelite disc complying with FEPA standards, AR 30

## Advantages

- The use of water helps reduce dust and keep the laboratory clean

Zhermack offers classic and fast investment pre-heating furnaces.

**DM** series consists of multi-programme pre-heating furnaces indicated for preheating overnight and fast investments.

**DE** series are one-programme pre-heating furnaces with two holding phases, indicated for preheating fast investments.

## Characteristics

DM

- Tube heating system: the heating elements are housed in special alumina tubes to offer high performance and reliability
- 10 storable four-phase programmes. The aspirator OFF temperature can be set
- Starting delay, with the possibility of setting the day and hour when the oven will start operation
- Optional fume extractor

DE

- Programme with one firing cycle consisting of two holding phases, each with the possibility of setting:
  - Temperature
  - Holding time
  - Heating speed
- Starting delay

## Advantages

- The tube heating system makes heat exchange more efficient than in a traditional muffle
- Lower electricity consumption
- Reliability over time
- A programme can be modified, even while running

# Quasar | Quasar Plus

Infrared welding machines

Equipment / Casting and welding

**Quasar** is an infrared welding machine for braze welding on precious metals and base alloys without direct flame.

Quasar welding machine is designed to produce thermal energy by means of an optical infrared system generating a maximum temperature of 1350°C. Quasar Plus has the same technical characteristics as Quasar welding machine, with the addition of a pedal device for spot welding the metal structure in argon atmosphere\*.

## Characteristics

- Perfect thermal energy focussing on specific welding area
- Power regulation system allowing the heating temperature to be set. This allows the elements for welding to be heated gradually, avoiding damage to the crystalline structure
- Mechanical centring system for accurate spot welding of the elements

## Advantages

- Quick and easy to learn welding method
- Infrared welding eliminates combustion and oxidation during the heating phase
- The Quasar Plus welding process is quicker than traditional and laser methods

# Ario 35

Micromotor

Equipment / Casting and welding

**Ario 35** is a micromotor for finishing, cutting and polishing prostheses in the surgery and laboratory.

## Characteristics

- Traditional DC motor (with manifold) with high torque values and maximum speed of 35,000 rpm
- Electronic microprocessor control to optimise motor performance and working life
- Precision mechanics with top quality materials and components

## Advantages

- High efficiency with minimum investment

Ario 35

Ario 35

Code	Model	Size (L x D x H - mm)	Weight (kg)	Power supply (V / Hz)	Total power (W)	Engine torque (Nm)	Handpiece weight (kg)

**Cyclope** is designed to heat metal spatulas and similar tools used to model objects in dental wax. Electromagnetic induction heating.

With Cyclope, the majority of dental modelling can be done without using an open flame bunsen burner.

## Characteristics

- Electrical operation does not require connection to the mains gas supply
- The instrument reaches temperature in just two seconds
- Two silicon caps protect the chamber from scratches and wax residues

## Advantages

- Safety: no risk of burns and better air quality in the dental laboratory thanks to elimination of the naked flames which remove oxygen from the work environment
- Practicality: mobile and ready for use immediately, can be located in the most convenient position for the operator
- Energy saving: minimum consumption thanks to the heating control with two external sensors

# VAP 8 | VAP 8A

Steam cleaners

Equipment / Surface polishing and cleaning

The result of twenty years' experience making steam generators, Zhermack's **VAP 8** range satisfies the dental laboratory's needs for in-depth cleaning, heating power and long operating time.

Power, reliability and safety are the distinguishing characteristics of the VAP 8 and VAP 8A line of hot water and steam generators, designed for a long working life.

The VAP 8 and VAP 8A generate a flow of steam or hot water at high pressure, used to clean prostheses for dental use.

## Characteristics

- Fixed 8 bar nozzle for dry steam
- Antistatic safety device
- Maximum working pressure 8 bar
- Electronic heating element protection system: when the water runs out, the system cuts off power to protect the heating element
- TSS (Triple Safety System)\*
- Stainless steel 4 litre tank
- VAP 8: steam only
- VAP 8A: water and steam

## Advantages

- High pressure to satisfy the cleaning needs of the laboratory or surgery
- Reliability provided by high quality components and the experience in making steam generators
- CE certified safety (EMC, LVD and PED), EN61010

# AD 8

Water softener

Equipment / Surface polishing and cleaning

**AD 8** is a water softener recommended for steam generators with mains water fill.

A cation resin water softener is the ideal solution, indispensable to prolong steam generator life.

In addition, by adding a simple T-junction, it can also supply demineralised water for other laboratory uses.

## Characteristics

- Made from stainless steel
- Guaranteed continuous water delivery, even during resin regeneration
- Regenerated using NaCl (coarse cooking salt)

## Advantages

- The water softener extends the working life of the steam generator
- It produces demineralised water for other uses in the laboratory (e.g. for mixing stone), thus improving the quality of the elements
- Low maintenance costs (resin regeneration using coarse cooking salt)

# Zeta Sonic

Ultrasonic bath

Equipment / Surface polishing and cleaning

**Zeta Sonic** is an ultrasonic bath for a rapid and deep cleaning of dental prostheses and tools in metal, plastic, glass, ceramic or other materials.

## Characteristics

- Stainless steel bath
- Waterproof display
- Innovative sweep and degas function
- Display to regulate time and temperature
- Auto-OFF (after 12 hours)

Zeta Sonic

## Advantages

- Practicality: it helps in reducing the time for cleaning prostheses from gypsum or other materials. It speeds up the action of alginate and gypsum removal products
- Smart machine: maintains the temperature set during use and turns off by itself after 12 hours

# California

Sandblaster

Equipment / Surface polishing and cleaning

**California** is a modular micro sandblaster for smoothing, polishing and roughening sandblasting prosthetic elements.

Conceived to support the lab technician during sandblasting, this tool is efficient, simple to use and fast.

Thanks to its technical features, the California sandblaster is designed for a long working life, while at the same time improving the quality and ease of sandblasting and, above all, reducing consumption and working costs.

## Characteristics

- Pinch valve to stop the flow of air and sand instantly, appreciably reducing sand consumption.
- Constant flow. Designed down to the smallest detail to obtain a constant flow even at low pressures:
  - Double flow of air in the cylinder (25 - 70  $\mu\text{m}$  cylinder only)
  - Double flow of air in the cylinder base (all cylinders)
  - Calibrated tubes and parabolic nozzle
- Designed to last. Technical design focussing on improved reliability: inlet tubes entering the chamber directly, high quality pneumatics

## Advantages

- Low consumption
- Constant flow even at low pressures (particularly indicated for pressed ceramics and cosmetic elements, such as veneers)

California

# Sand S 24 R

Sandblaster with recycling system

Equipment / Surface polishing and cleaning

**Sand S 24 R** is a dual-module sandblasting machine with recycling system for the sandblasting of dental prostheses.

Used for devesting, roughening and surface treatments.

## Characteristics

- Recycling system, equipped with Widia nozzle (ø 3 mm), which allows reuse of material deposited on the bottom in rough-shaping operations
- Equipped with two cylinders with a usable capacity of approximately 0.5 litres each
- Cylinder selector inside the chamber

## Advantages

- Low sand consumption thanks to the recycling system
- Greater dependability and low maintenance for a minimum investment cost

Sand S 24 R

Code	Model	Size (L x D x H - mm)	Weight (kg)	Power supply (V / Hz)	Total power (W)	Operating pressure (bar)	Required input pressure (bar)	Tank capacity (l)	Sand (µm)	Recycling
C305604	Sand S 24 R	370 x 420 x 370	11	230 V ± 10 % / 50 - 60 Hz	9	3 - 6	6 - 8	0.5	25 - 250	Yes

### STANDARD COMPONENTS

Code	Description
XR0060040	Nozzle ø 0.8 mm

Code	Description
XR0060050	Nozzle ø 1.3 mm

### ACCESSORIES

Code	Description
XR0060050	Widia nozzle ø 1.3 mm for sands from 110 to 250 µm
XR0060040	Widia nozzle ø 0.8 mm for sands from 60 to 110 µm
XH9900050	Nozzle ø 3 mm for sand recycle

Code	Description
XR0060612	Extra filter for Sand S 24 R
XR0060065	Glass protection sheet (10 pcs)

# SAB 1000 | SAB 1000 G

Extractors for sandblasting machines and model trimmers

Equipment / Surface polishing and cleaning

**SAB 1000** aspirator is designed for use with sandblasters.  
**SAB 1000 G** is designed for dry model trimmers to extract the dust.

## Characteristics

- High power and reliability
- Guaranteed filtering up to 0.3 µm
- Two-ply filter paper specifically for extrafine sands

## Advantages

- Excellent aspiration of sand from the blasting chamber
- Reliable, easy cleaning and maintenance
- Powerful constant aspiration

SAB 1000 - SAB 1000 G
